"Moving Toward the Light – One Family's Journey into Solar Power"

**Speaker: Jim Evans, Director
Multimedia Services**

What do you do when you want to offset your carbon footprint but don't have the room to plant 34 acres of trees? You do the next best thing and install 50 photovoltaic panels. The result—elimination of about 287 tons of carbon pollution, generation of about 1104kWh of power each month, and a dramatic reduction in your electric bill. Join us to see what it took and how the Evans family did it.

Friday, February 10 ~ 12:00 noon to 1:00 pm

Folsom Library Fischbach Room

Free! Everyone is welcome!

Bring your lunch or purchase one at the Library Cafe.

Dessert will be provided.
